DESCRIPTION

AETES Intelligent PDU allows an administrator to access from a remote terminal and interface with it to turn on or off outlets and it can monitor every outlets power consumption through web and local ampmeter, and optional accessory can support humidity and temperature detection.

FEATURES

- Integrated web server manages can real time to monitoring the power consumption of PDU.
- Build-in true RMS 3 digits current meter.
- Easy set up, meter display the IP directly.
- Secure access with SSL encryption
- Provide per outlet power consumption.
- Send the email and traps when the power consumption exceed the trigger value of warning or overload to the PDU.
- Provide utility, it can monitor a large mount of PDU at the same time.
- Support the SNMP and provide MIB for the PDU to be monitored by NMS.
- Real time to control outlets of PDU.
- Indicate circuits status with LED.
- Optional accessory can support temperature and humidity detection.
