DESCRIPTION

AETES AC to AC 400Hz Converter is a high technology equipment, including all protection and control systems, which is designed and manufactured to convert an AC voltage to another pure sinus and regulated AC voltage with 400Hz frequency. It provides AC power, which is especially important for Industry, Marine, Naval and Defence applications. This equipment contains an output isolation transformer, it provides full electrical isolation between AC input supply and AC output, and uses all advantages of Digital Signal Processor control. It provides handy user interface and advanced communication features.

FEATURES

- 12 Pulse rectifier to limit input current distortion
- Internal Isolation Transformer at output
- Full Digital Controlled conventional rectifier and IGBT inverter
- Soft start, smart control and high reliability with digital signal processor
- User language selection from front panel (DE, EN, ES, NL, PT, TR etc.)
- Low output voltage ripple and high reliability
- User panel with LCD display, showing measurements, status and alarm messages
- Audible alarm and led indicators for easy observation of status
- Calibration of measurements from front panel
- DC Low, DC High, Line Failure, Over Temperature, Short Circuit protections
